Job Description			
<p>About Delair-Tech</p> <p>Delair-Tech, a leader in professional UAVs, provides aerial-imagery-based data to help industries make informed decisions. Experts in both long-range UAV manufacturing and data processing, Delair-Tech delivers end-to-end solutions, from data acquisition to business analysis. Created in 2011, Delair-Tech is represented in more than 80 countries and has over 100 global employees with specialized solutions in various sectors, including: agriculture, geomatics, transport, electric power, oil and gas, mining, and security.</p> <p>In 2016, Delair-Tech is continuing to consolidate its position in the commercial UAS market by acquiring the UAS business of Trimble, Gatewing. Alongside its acquisition, Delair-Tech has signed strategical distribution agreements with Trimble.</p> <p><i>Who is the team behind Delair-Tech?</i> The ambitious and fast growing 100 people team is headquartered in Toulouse, France, with offices in Ghent (Belgium), Singapore and Los Angeles (USA).</p> <p>Job Summary</p> <p>We are looking for a Product Manager "Geospatial", who will be responsible for the hardware products, analytics and services Delair-Tech offers to the Geospatial sector. The product manager reports to the Chief Product Officer (CPO).</p> <p>The Missions</p> <p>The Product Manager's missions are:</p> <ul style="list-style-type: none"> • Have a vision about the Geospatial market and its future evolution. • Have precise insights in the needs of the customer, today and in the future as well as insight in what the competition offers. • Define a product strategy for addressing the Geospatial market taking in to account the potential of the market, the needs of the customer and the technical capacities of the company. • Propose, validate and be the owner of the Geospatial product roadmap, define the specifications of product updates, new products and follow the developments. Make sure that the products fit with business model and strategy of the company. 			

- Propose the 'go to market' strategy of the products using the sales channels and options available (indirect distribution, direct sales, partnerships, etc.). This includes in particular, the Trimble dealer channel that sells our professional Geospatial products worldwide today and our direct sales that focus on our expert line of Geospatial products.
- Manage the release process of new products and features including writing the sales documentation and organizing the training of the internal teams.
- Evaluate the performance of product features.
- Collect and prioritize product ideas
- Support the sales team during their daily sales activities.
- Interact with different entities of the company (sales, engineering, marketing) to ensure a fit between the 'go to market' strategy and the strategy of the company.

The Profile

We are looking for people with a technical background and some product management experience. We also value technical knowledge in geomatics, photogrammetry and remote sensing. Since the job involves intercultural business relationships, we will take into account international professional experiences.

ATTRIBUTES

- Autonomous: Capable to work individually in a position of independence in the company
- Quick learner: Capable to understand the systems and our offer
- Strong character: Capable to work in a demanding environment
- Empathic person: Capable to understand the client's needs, gain their trust and convinced them to buy
- Result-driven: Capable to articulate goals and stablished timelines
- Capable to express himself/herself in different languages in a clear and direct way
- Creative and reactive: Capable to solve problems and possess and appropriate sense of urgency
- Good work ethics
- Persistent for the purpose of succeeding. It's all about winning the deal!
- At-ease in very technical environments with some notions of computer science, data processing and imagery

QUALIFICATION AND SKILLS

- Fluent in English, sound knowledge of French, extra languages will be appreciated.
- Good writing skills
- Technical knowledge: Interest in the innovation, technical environment and drone industry and/or remote data acquisition (aerial, satellite, others).
